

Engage every student. Maximize every minute.

FOSS® Pathways™ is a PK–5 three-dimensional science program streamlined to meet state and national science standards. Its hands-on exploration of local and relevant phenomena engages students of all backgrounds and abilities, building a strong foundation in science that develops critical thinking skills they'll use for life.

Science Class on Your Schedule

60 lessons a year (2x/week) in grades K–2
90 lessons a year (3x/week) in grades 3–5

Editable Teaching Slides

Investigation Teaching Slides available in English and Spanish. Slides can be translated into additional languages using Google Translate

Unparalleled Sensemaking Tools

Students analyze data, develop models, and construct explanations

Versatile ThinkLink™ Platform

Easily assign multimedia, simulations, readings, and assessments. Drive instruction using standards-based reports

Hands-on Exploration of Phenomena

Each unit sparks curiosity and builds understanding of science concepts that are meaningful
